brian-lam.netlify.app | San Jose, California | (408) 981-8982 | Lamb9@uci.edu

TECHNICAL SKILLS

Languages: JavaScript | TypeScript | HTML5 | CSS3
Frameworks/Libraries: React | Redux | Bootstrap | Node.js | Express.js | MongoDB | Mongoose | Local Storage
Achievements: Hacker Rank Certificates (JavaScript, React, Rest API) | J.P Morgan SWE Virtual Experience

EDUCATION

University of California, Irvine   *Jun 2020*
B.A. in Business Economics | Honors: Dean's List

PROJECTS

MyAnimeFaves | React | Single Page Application
- Developed a SPA using React that fetches anime data from an API using a query specified by the user
- Utilized Redux to manage app-wide state while using action creator thunks to handle side effects
- Handled URL changes using React-Router to render new content on the screen
- Integrated Firebase authentication to securely log users in and store user data into a Firebase database

To-Do List | React | Web Application
- Deployed a web application using React that allows users to create, read, update, and delete tasks
- Managed state using react hooks and implemented cross-component state using prop chains
- Implemented task filtering by date using JavaScript array methods and the Date constructor
- Persisted user data by utilizing local storage to store user data onto the browser

Hungrify | HTML, CSS, JS | Single Page Application
- Engineered a front-end application using vanilla HTML, CSS, and JS while following a MVC design pattern
- Utilized event listeners to render content conditionally based on changes in the URL
- Maintained a publisher-subscriber pattern by handling events inside the controller and listening for them in the view
- Implemented a bookmarking feature by storing user data in the browser with local storage

Portfolio | HTML, CSS, JS | Live Website
- Designed and wireframed a modern portfolio website using Figma while utilizing common design patterns
- Curated a color system while maintaining sufficient color contrast to meet proper web accessibility guidelines
- Coded the website while following the BEM methodology for naming classes
- Utilized Netlify's built-in form handling to handle user form submissions without the need of a back-end

WORK EXPERIENCE

Novogradac & Company LLP | **Staff Accountant Intern** – *San Francisco, CA*   *Jan 2021 – Apr 2021*
- Completed comprehensive audits and reviews based on PCAOB standards and cooperated with 5+ financial institutions daily to confirm client account balances resulting in timely submitted audits
- Succeeded in preparing and filing tax returns within the company's allocated budget time of 8 hours per return while working in a fast-paced environment due to the tax season

Rocket EMS | **Receiving Clerk** – *Santa Clara, CA*   *Oct 2020 – Jan 2021*
- Inspected 100+ packages per day verifying goods against invoices and reconciling inconsistencies, ensuring a smooth transition from received goods to work orders
- Applied attention to detail when processing and updating records for incoming shipments while simultaneously communicating with buyers and project managers, allowing the company to meet urgent customer demands

LEADERSHIP EXPERIENCE

Zeta Phi Rho | **Violence Intervention Prevention Officer**   *2019 – 2020*
- Planned and facilitated several on-campus events to bring sexual violence awareness, including developing educational pamphlets, presentation, and marketing materials
- Led training sessions for general members to support victims of sexual assault
